

Nautobot Professional: Your Foundation for Self-Managed Network Automation

Deploy Nautobot on-premises or in your own cloud environment with expert support, operational visibility, and built-in tools that help your team move from planning to production faster.

SELF-MANAGED CONTROL, STRONGER AUTOMATION START

Nautobot Professional is the commercial edition of Nautobot from Network to Code, built for organizations that want to deploy and manage the platform in their own environment while accelerating time to value with expert support and operational tooling needed to turn network automation plans into production workflows.

KEY CAPABILITIES

EXPERT SUPPORT

24x7 ticketing, scheduled touchpoints, and guidance from the team behind Nautobot.

DEVICE DISCOVERY

Automatically discover devices and identify unmanaged, or rogue devices faster.

INSIGHTS DASHBOARDS

View inventory, lifecycle, and automation activity from one operational view.

OPERATIONAL TOOLS

Troubleshoot from Nautobot with built-in tools and support-ready diagnostics.

ANSIBLE INTEGRATION

Run AAP and AWX jobs directly in Nautobot without switching tools.

NAUTOBOTAI ASSISTANCE

Use AI tools to troubleshoot issues, assist regex and Nautobot Job development.

WHO IT'S FOR

Nautobot Professional is built for organizations that want to keep deployment control on-premises or in their own cloud, while reducing friction with expert guidance, built-in troubleshooting tools, dashboard-based visibility, and faster onboarding of devices and data.

- >>> Network engineers & NetOps teams building their automation foundation
- >>> Teams moving from evaluation & planning into production workflows
- >>> Organizations that need self-managed on-prem or cloud control
- >>> Teams that have outgrown community-only tooling and need commercial support and operational visibility

“

Nautobot is an excellent value add to any network that wants to track equipment and server related entities.”

ENGINEER - TELEMUNICATION

“

Nautobot is a great tool for bridging the gap between traditional networking and network automation.”

IT ASSOCIATE - RETAIL

HOW IT WORKS

DEPLOY

Run Nautobot on-prem or in your cloud

DISCOVER

Identify devices & onboard inventory

AUTOMATE

Execute workflows & Ansible jobs

MONITOR

See more with dashboards + AI insights

COMPARE NAUTOBOT DEPLOYMENT OPTIONS

Capability	Community	Professional	Enterprise	Cloud
Best Fit Select the right Nautobot edition based on your current needs and future goals	Teams exploring Nautobot and building initial workflows	Teams building their enterprise automation foundation	Teams requiring advanced automation and compliance	Teams prioritizing speed, scale, and minimal operational overhead
Deployment Model Flexible deployment options aligned to your infrastructure and governance requirements	Self-Managed (on-prem/your cloud)	Self-Managed (on-prem/your cloud)	Self-Managed (on-prem/your cloud)	Fully managed SaaS
Open Source Apps Access a broad ecosystem of free, NTC-maintained Nautobot applications	✓	✓	✓	✓
